

Braidel

Version 1.0

SUMMARY

Braidel is a specialized workforce and marketplace platform built exclusively for the hair braiding industry.

EXECUTIVE SUMMARY

Braidel is a specialized workforce and marketplace platform built exclusively for the hair braiding industry.

The platform addresses two major challenges currently faced within the industry:

1. Salon owners struggle to find reliable and skilled braiders. 2. Professional braiders struggle to find consistent work opportunities and clients.

Braidel will initially launch as a staffing and workforce marketplace connecting salons and braiders. As the platform grows, it will evolve into a complete ecosystem that includes client booking, professional certification, product distribution, training, and eventually a salon franchise network.

The long-term goal is to become the leading operating system for the braiding industry.

VISION

To become the most trusted platform connecting braiders, salons, and clients while creating economic opportunities throughout the global braiding industry.

MISSION

To simplify how braiders find work, how salons find talent, and how clients find trusted braiding professionals.

Braidel will create a transparent, professional, and scalable ecosystem that elevates the braiding profession and supports business growth for everyone involved.

CORE OBJECTIVES

Objective 1: Help salon owners quickly find qualified braiders. Objective 2: Help braiders access more work opportunities. Objective 3: Create a trusted professional network within the braiding industry. Objective 4: Provide clients with a reliable way to discover and book braiding services. Objective 5: Build a national and eventually international braiding ecosystem.

TARGET USERS

User Type 1: Salon Owners Salon owners can create salon profiles, post staffing opportunities, search for braiders, manage applicants, review braider profiles, receive client bookings, and build their reputation.

User Type 2: Independent Braiders Braiders can create professional profiles, upload portfolios, apply for opportunities, receive direct booking requests, build ratings and reviews, and track work history.

User Type 3: Clients Clients can search braiders, search salons, view photos, compare ratings, book appointments, and leave reviews.

PLATFORM DEVELOPMENT ROADMAP

PHASE 1: Workforce & Staffing Platform Primary Goal: Connect salon owners with braiders looking for work. Includes Salon Dashboard (Create Profile, Post Opportunities, Manage Applicants), Braider Dashboard (Create

Professional Profile, Portfolio Gallery, Job Applications), Messaging System, Rating System, and Revenue Model (Phase 1).

PHASE 2: Client Booking Marketplace Primary Goal: Allow clients to book services directly. Includes Search Functionality, Booking System, Calendar Integration, and Review System.

PHASE 3: Online Payments Includes Client Payment Processing, Deposits, Automated Commission Splits, and Refund Management.

PHASE 4: Reputation & Verification System Includes Verified Braider and Verified Salon requirements and badges.

PHASE 5: Braidel Academy Includes courses and certifications.

PHASE 6: Braidel Supply Includes product categories and wholesale program.

PHASE 7: Braidel Salon Franchise Includes franchise model and benefits.
